

[How to Install Microsoft .NET Framework 3.5 Offline in Windows 8 without Internet Connection?](#)

Download the zip file from

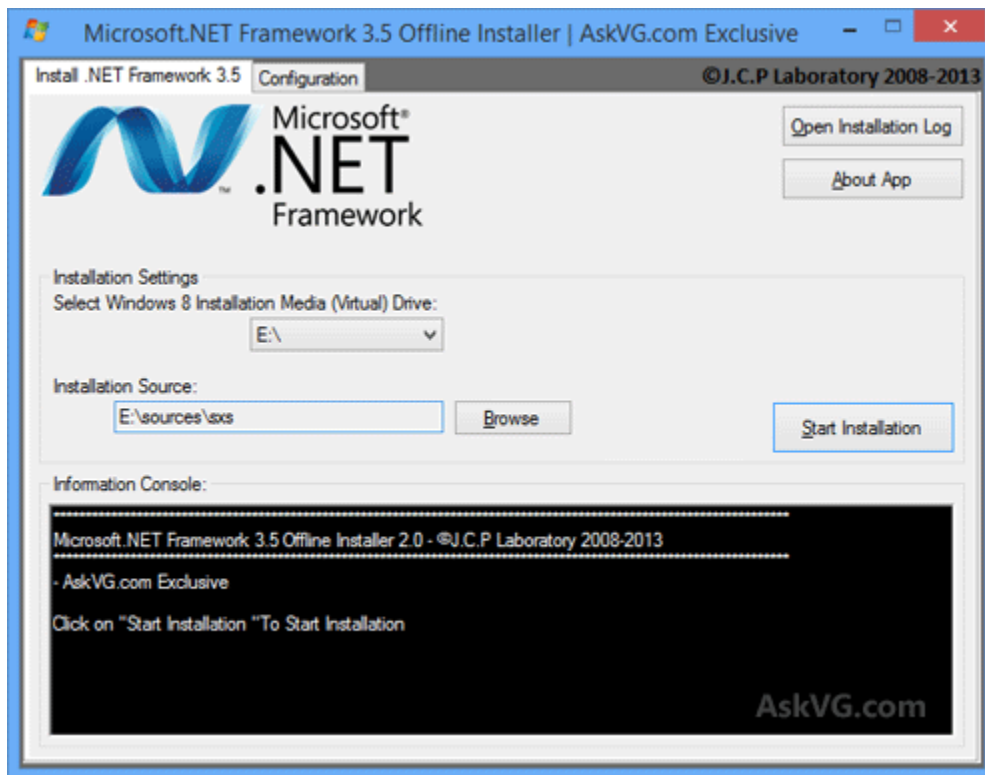

<http://www.dcsinfo.com/downloads/2017Versions/DotnetFrameworkforWin8andWin10/net%20frameworkOffline.zip>

Extract the file you will get two file Source and installer exe.

Open the file Microsoft .NET Framework 3.5 Offline Installer.exe (run as administrator)

Click on browse and locate the source folder

"**Microsoft .NET Framework 3.5 Offline Installer**" is a freeware created for Windows 8 which helps you in installing .NET Framework 3.5 in your system without any need of Internet connection. Open the file Microsoft .NET Framework 3.5 Offline Installer.exe

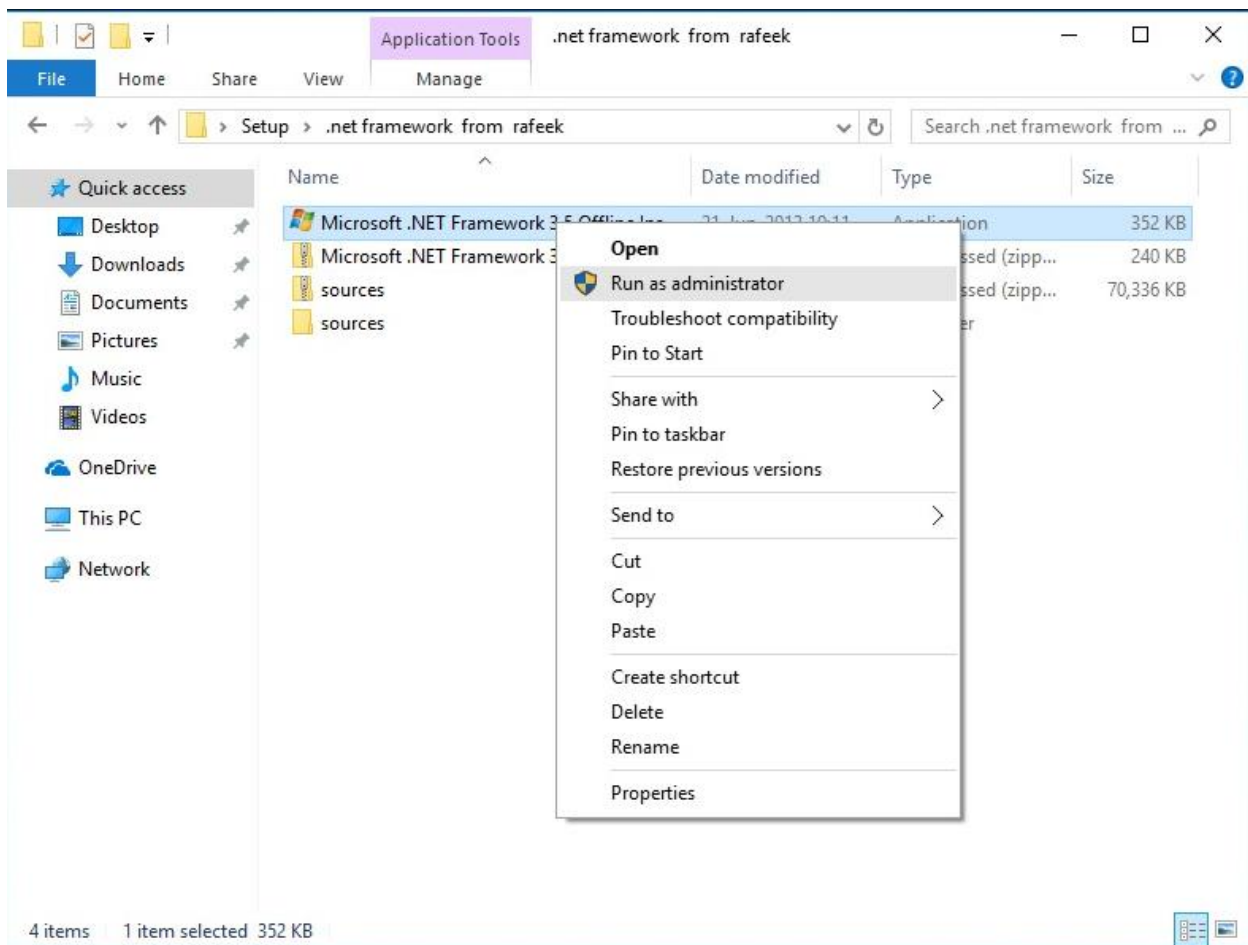

if you copied Windows 8 setup files in E:\ drive of your hard disk, you can click on "**Browse**" button given in the freeware and then go to the Windows 8 setup folder. Select "**sxs**" folder present under "**sources**" folder and then click on "Install" button to install .NET Framework 3.5 in your system.

This small piece of software also provides debugging options for advanced users. You can go to "**Configuration**" tab and enable the option to show installation process. It'll help you in finding the culprit in case you face any problem while installing .NET Framework 3.5 in Windows 8.

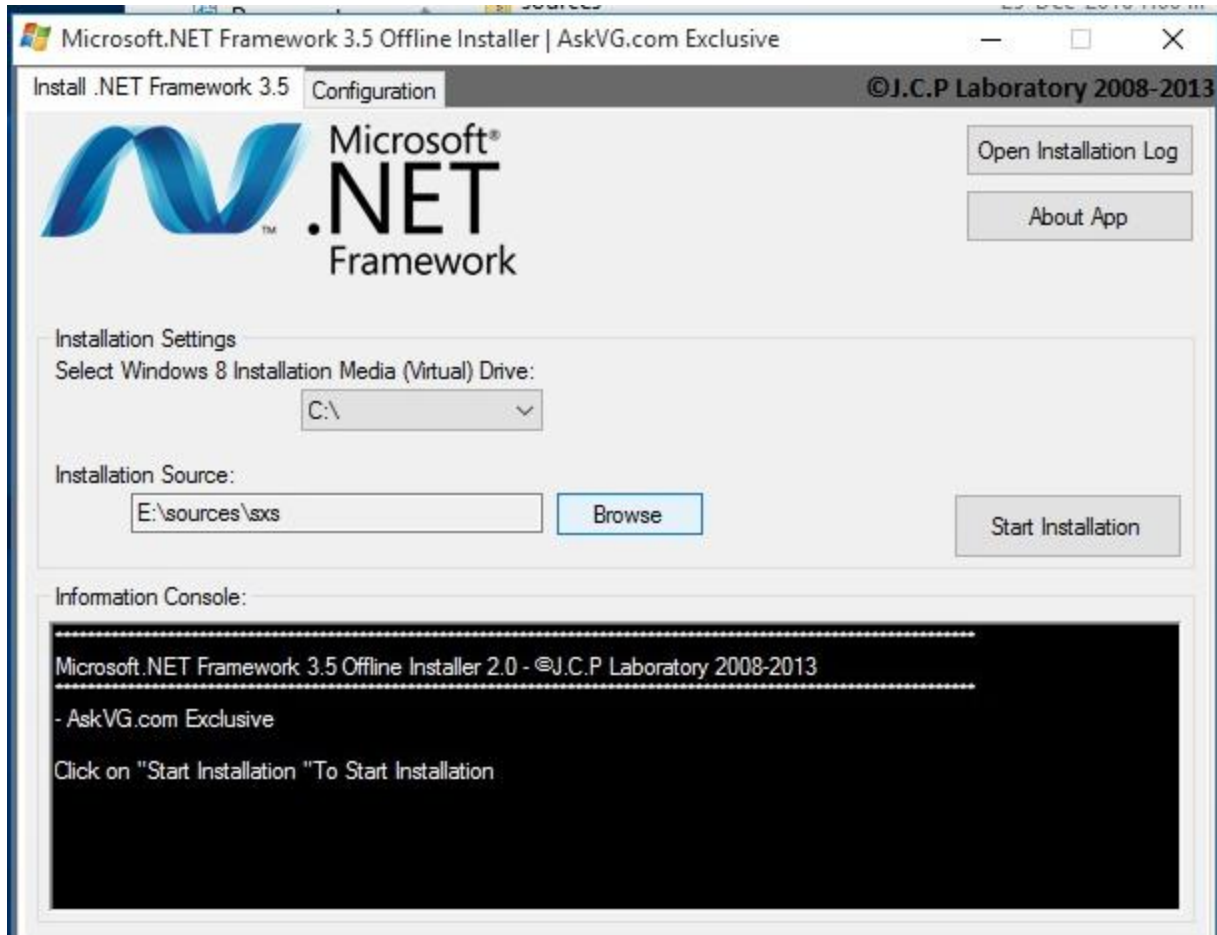

This software will work in both **32-bit** (x86) and **64-bit** (x64) editions of Windows 8. You'll need to run the software with Administrator privileges by right-click on the program icon and select "**Run as Administrator**" option. Its required because the method only works if the user has Administrator privileges.

You can download the software using following link:
